MiniBar

MiniBar is a utility for Windows 8 which aims at simplifying the desktop with a single ribbon that supports the customisation of shortcuts and running programs with ease. The ribbon consists of a single place where you can keep all your favourite shortcuts, applications and frequently used tools. You can easily access it from the Windows taskbar (which is also where you can pin it to the taskbar) and control it from a context menu. It can store up to 38 shortcuts and it's always running so you can get to them quickly. It's placed in the system tray so you can access it from the taskbar with just a click. The application is also a great tool to access the system configuration. You can pin shortcut to the taskbar, remove existing shortcuts and control how it is launched. You can even pin it to the system tray and restore it at a single click. Features Saves up to 38 shortcuts to the system tray and launches them in a single click. You can customize its order, remove existing shortcuts, pin it to the taskbar, disable it at startup and launch it from the context menu. Unlimited number of shortcuts (minimum 2). Automatic restoration on start up. Placement on the taskbar. Placement in the system tray. How to install MiniBar You can install MiniBar by clicking on the following link from a Windows 8, Windows 8.1 or Windows RT machine and it will appear as an app. Alternatively, you can download a.msi file for installation. Minor bug: A restart is required for the MiniBar to appear in the context menu. However, this is considered a bug in Windows 8 because the windows installer supports restartless installation, which would allow MiniBar to appear in the context menu without having to restart. What's New In MiniBar?

MiniBar enables you to organize and launch the most used application on your computer. You can add shortcuts to apps, to websites, to folders, and even create your own tools (e.g. calculator). The tool bar stays on top of all windows you have open, and you can add as many tools as you wish, anywhere you want. Features: - Unlimited number of shortcuts, or even one-off tools. - Works perfectly on the desktop, even when you are using Internet Explorer. - No customization required. - Save the current context (to access the ribbon) by just double-clicking a tool. - Restore the tool bar with a click. - Move shortcuts to the desktop to hide them, and move back to the ribbon to display them. - Automatically resizes to fit the screen size. - Works on all versions of Windows. - Works on the command line as well. - Adds a small notification bar, as well as the usual system tray icon. - Convenient hotkey for launching tools. - Restores the bar with a click. - Compatible with Taskbar Overflow, which enables you to add the ribbon to the right-click menu of the taskbar. - Works in both Windows 7 and Windows 8. - You can even use a traditional mouse with MiniBar! How to use MiniBar Open MiniBar and drag the corresponding icon on your desktop and click on the arrow to open the context menu. You can add/remove a shortcut as much as you want. For instance, you can drag a shortcut to open a website, drag another to launch a calculator etc. Then drag it to another desktop or click on the right-click menu of a taskbar to move it back to the tool bar. You can configure the tool bar to show at startup and not be hidden when you launch an application by following the provided instructions. You can also move tools between the desktop and the ribbon by drag & dropping them. You can also customize your tool bar by adding more shortcuts to it, or removing those that you don't use.
