(NASDAQ:AAPL) may be planning to release a new line of iPhone models next month. This is according to AppleInsider, which cited Japanese magazine MacOtakara, which claims that Apple plans to release a cheaper iPhone model with Wi-Fi capability. According to the report, MacOtakara claims that Apple is planning to release a new iPhone model with Wi-Fi capability next month. The model will cost around \$149 and be available for pre-order in the US on September 14, according to the report. Apple is planning to release a new iPhone model with Wi-Fi capability next month. The model will cost around \$149 and be available for pre-order in the US on September 14, according to the report. While there is no way of knowing whether Apple will announce a new iPhone model on September 14 or on another date, the iPhone's (iOS 5) end of the year launch has been rumored for September 9, which coincides with the launch of the iPad 2 and Apple's new iPad. The report also claims that Apple will launch a cheaper iPhone model on September 14, with an estimated price of around \$149. "With this, Apple is definitely one step closer to giving away the iPhone," the report stated. Earlier this month

### What's New in the?

Markup Import and Markup Assist: Rapidly send and incorporate feedback into your designs. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. (video: 1:15 min.) AutoCAD Array: Use AutoCAD's dynamic array system for efficient multi-line toolpath creation and for repetitive work, such as describing toolpaths or reviewing manufacturing documentation. When used for toolpath generation, AutoCAD Array is significantly faster than traditional dynamic arrays. (video: 1:35 min.)
